

Easy handling Highly flexible

➔ Robust configurable radio remote control system for industrial and mobile applications.

- Developed for extreme environments where there are high demands on shock and vibration sensitivity
- Waterproof design on transmitter and receiver (IP67)
- 12-channel automatic frequency selection
- A LED on the transmitter indicates contact with the application
- Six configurable functions
- Extremely fast function response time
- Receiver with glass-reinforced plastic housing and protective vent membrane
- Possibility for custom transmitter layouts
- Light-pressured long-life buttons, over 1000000 cycles momentary
