

# Efficient work Reduced downtime

## ➔ Robust and reliable radio systems for vacuum vehicles

- IP67 (transmitter & receiver)
- Robust - designed for tough environments
- Ergonomic, user-friendly,
- light-weight transmitter
- Simple method for replacing broken or lost transmitter
- Two-way communication (Battery status, signal strength, radio connection status)
- Radio frequency (scanning): 433-434 MHz
- Operating voltage: 12/24 V DC
- 24 on/off functions
- 24h battery time
- Receiver in a robust aluminium housing
- E-approved
