Efficient work
Reduced downtime

→ Robust and reliable radio systems for mobile applications

- Easily configurable functionality
- Two-way communication (Battery status, signal strenght, radio connection status)
- Radio frequency: 433-434 MHz (scanning, hopping and fixed)
- IP67 (transmitter & receiver)
- Robust - designed for tough environments
- Ergonomic, user-friendly, light-weight transmitter
- Simple method for replacing broken or lost transmitter
- Operating voltage: 12/24 V DC

- 24 on/off functions
- 24h battery time
- Receiver in a robust aluminium housing
- E-approved
- Short delivery times
