

# Increased safety Reduced downtime

## ➔ Radio solutions for optimal use in vacuum vehicles

- Robust design for withstanding tough environments
- High power radio provides a stable, interference free signal
- IP65-IP67
- Two-way communication (Battery status, signal strength, radio connection status)
- Radio frequency (scanning): 433-434 MHz
- Operating voltage: 12/24 V DC
- 24h battery time
- Receiver in a robust aluminium housing
- Ergonomic and user-friendly transmitters
- E-approved
