

Efficient & Reliable winch operations

→ Robust radio remote control system for winches

- Robust radio control system for single/double winches (i.e. for ATV, forest machines)
- Developed for extreme environments where there are high demands on shock and vibration sensitivity
- Water and dust proof design (IP67)
- Duplex (two-way radio) which enables a relay feedback indicator on the transmitter
- 12-channel automatic frequency selection
- One extra non-movement function
- Very fast function response time
- Transmitter with highly durable long-life push-buttons
- Receiver with glass-reinforced plastic housing and a protective
