

Safe & Reliable tail lift solutions

→ Robust and flexible radio remote control solutions

- Range limitation for safe distance work
- Configurable system suited for most tail-lifts
- Developed for extreme environments where there are high demands on shock and vibration durability
- User-friendly, high quality transmitters
- Duplex (two-way radio) secures the acceptance of the transmitted message (LED indicator)
- Water and dust proof design (IP67)
- Fast response time
- 12-channel automatic frequency selection
- Highly durable long-life pushbuttons
